

A MITEL E-BOOK

THE ADVANTAGES OF TRANSITIONING FROM MIVOICE OFFICE 250 TO MIVOICE BUSINESS

As a user of MiVoice Office 250, we want to thank you for choosing our products and your confidence in Mitel. We continue to push innovation by offering business communications and collaboration software and services to meet customer needs. Our solutions allow the flexibility and simplicity needed to support today's competitive and ever-changing business environment.

The perfect solution for customers previously on MiVoice Office 250

MiVoice Business provides your organization with a complete communications, collaboration, and customer experience solution. An incredibly feature-rich unified communications platform, MiVoice Business delivers the choice and deployment flexibility demanded by today's UC customer.

Large, small or in between, MiVoice Business is designed to fit the unique needs of any size organization at each stage of its growth.

Mitel recently introduced a new SMB Controller on MiVoice Business, to address the small business customer or branch office segment - which offers Enterprise-level features in a small business package, for up to 150 users. This is the perfect solution for customers previously on MiVoice Office 250.

Deployment Flexibility

With the option to deploy their solution on-premises, in a public or private cloud environment – MiVoice Business can be licensed with either a traditional upfront CapEx purchase or with a OpEx subscription.

Integrated Collaboration, conferencing, and customer experience solution

MiVoice Business provides a full communications solution with messaging, collaboration, and contact center capabilities.

MiCollab and MiTeam Meetings offer enterprise collaboration software and real-time video conferencing for businesses across time zones and geographies that securely and swiftly powers communications. And you can also integrate MiContact Center Business, to support a few call center agents or a thousand omnichannel agents.

Full Range of IP Desktop & Accessories

MiVoice Business offers a full range of IP desktop devices, accessories, and meeting room solutions that deliver advanced applications when and where you need it.

With MiVoice Business, you get access to

- Deep call control, collaboration, meetings with MiVoice Business and MiCollab
- Advanced features comparable to those you have enjoyed with your current Mitel communications platform
- Deployment flexibility: On-site, private cloud, public cloud (AWS /Azure)
- In-office, hybrid or work-from-home options
- Broad portfolio of IP phones, market leading wireless SIP-DECT devices and accessories for growth
- Option to consume via monthly subscription commercial terms
- Smooth transition from your current Mitel communications platform to MiVoice Business
