

STRUCTURED CABLING & INFRASTRUCTURE SOLUTIONS

Parallel Technologies designs, installs, and maintains structured cabling solutions supporting voice, data, and video connectivity.

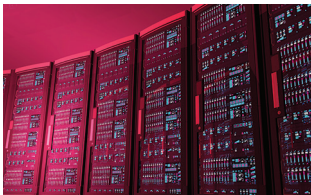

Our expertise encompasses a comprehensive array of communication infrastructure solutions, including standards-based Copper, Fiber, CAT 5e, CAT 6, CAT 6a, CAT 7 and Wireless solutions. Parallel provides a strategic approach to address the cabling needs of data centers, offices, warehouses, or any facility using category 5 (CAT 5E), category 6 (CAT 6, CAT 6a), category 7 (CAT 7) or fiber. This includes entrance facilities, equipment rooms, telecommunication rooms, backbone cabling, and horizontal cabling.

- Unified Communications
- VoIP & Hosted VoIP Solutions
- Video Conferencing
- Carrier Services
- LAN & WAN Services
- **Structured Cabling**

VOICE, DATA, AND VIDEO CABLING

Cabling is the backbone of your communication system. Your voice, data, and video cables are a critical component of your organization's communication infrastructure, making a structured cabling system essential for optimal internal and external communication.

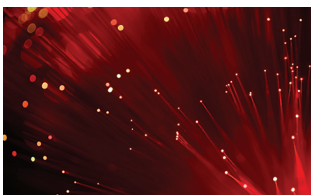

INFRASTRUCTURE SOLUTIONS

Your data center is the brainpower of your organization. Our strategic approach to infrastructure solutions means that every client's cabling design and installation is thoroughly and carefully planned, built, and executed.

CABLE NETWORK TESTING AND CERTIFICATION SERVICES

Voice and data systems must work as intended in order for your company to conduct its day-to-day operations. Parallel's wide range of testing services offer in-depth and precise testing of both new and existing cable networks to safeguard the function of your voice and data systems.
